                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ઠે
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 676, Application US/09093972C
Patent No. 6825174
GENERAL INPORMATION:
APPLICANT: Nyce, Jonathan W.
TITLE OF INVENTION: COMPOSITION, FORMULATIONS & METHOD FOR PREVENTION
& TREATMENT OF DISEASES & CONDITIONS ASSOCIATED WITH
BRONCHOCONSTRICTION, ALLERGY (IES) & INFLAMMATION

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 4, Application US/09220510B

Sequence 4, Application US/09220510B

Patent No. 6440726

GENERAL INFORMATION:

APPLICANT: RESNICK, INITZAN

TITLE OF INVENTION: RESPONSIVE ELEMENTS (SSRE) AND METHODS OF USE FOR

TITLE OF INVENTION: TREATING DISORDERS RELATED TO VASCULGENESIS AND/OR

TITLE OF INVENTION: ANGIOGENESIS IN A SHEAR STRESS ENVIRONMENT

TITLE OF INVENTION: ANGIOGENESIS IN A SHEAR STRESS ENVIRONMENT

CURRENT APPLICATION NUMBER: US/09/220,510B

CURRENT FILING DATE: 1998-12-24

NUMBER OF SEQ ID NOS: 6

SEQ ID NO 4

LENGTH: 11
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ó

Sequence 23, Application US/08025038
Patent No. 554526
Barear INFORMATION:
APPLICANT: BAXTER-LOWE, Lee-Ann
TITLE OF INVENTION: Method For HLA Typing
CORRESPONDENCE ADDRESS:
ADDRESSEE: Foley & Lardner
STREET: 777 E. Wisconsin Avenue
CITY: Milwaukee
STATE: Wisconsin
COUNTRY: Wilwaukee
STATE: Wisconsin
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/025,038
FILING DATE: 19930301
CLASSIFICATION: 435
PRIOR APPLICATION DATA:
APPLICATION NUMBER: O7/544,218
FILING DATE: 27-JUN-1990
ATTORNEY/AGENT INFORMATION:
NAME: Meyers, Philip G.
REGIEFORD ATTORNEY/AGENT INFORMATION:
NAME: Meyers, Philip G.
               FILING DATE: 7-Unne-1995
FILING DATE: 7-Unne-1995
APPLICATION NUMBER: US 09/016,464
FILING DATE: 30-January-1998
ATTORNEY AGENT INFORMATION:
NAME: Amzel, Viviana
REGISTRATION NUMBER: BPI-00672

Sequence 654, Application US/09093972C
Patent No. 6825174
GENERAL INFORMATION:
APPLICANT: Nyce, Jonathan W.
TITLE OF INVENTION: COMPOSITION, FORMULATIONS & METHOD FOR PREVENTION
& TREATMENT OF DISEASES & CONDITIONS ASSOCIATED WITH
BRONCHOCONSTRICTION, ALLERGY (IES) & INFLAMMATION
                                                                                                                                                                                                                                                   ö

Sequence 1, Application US/10228876
Patent No. 6733996
GENERAL INFORMATION,
APPLICANT: Froehlich, Allan C.
APPLICANT: Loros, Jennifer J.
TITLE OF INVENTION: METHODS FOR REGULATING GENE EXPRESSION USING LIGHT
FILE REFERENCE: DC-0194
CURRENT APPLICATION NUMBER: US/10/228,876
CURRENT PILING DATE: 2002-08-26
NUMBER OF SEQ ID NOS: 29
SOFTWARE: Patentin version 3.1

GENERAL INFORMATION:
APPLICANT: FALB, DEAN A.
TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE
TITLE OF INVENTION: TREATMENT AND DIAGNOSIS OF CARDIOVASCULAR DISEASE
NUMBER OF SEQUENCES: 38
CORRESPONDENCE ADDRESS:
ADDRESSER: PENNIE & EDMONDS
STREET: 1155 Avenue of the Americas
CITY: New York
STATE: New York
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            .;

Batent No. 6124433

GENERAL INFORMATION:

PAPLICANT: FALB, DEAN A

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE

TITLE OF INVENTION: TREATMENT AND DIAGNOSIS OF CARDIOVASCULAR DISEASE

NUMBER OF SEQUENCES: 54

CORRESPONDENCE ADDRESS:

ADDRESSE: PENNIE & EDMONDS LLP
STREET: 1155 Avenue of the Americas

CITY: New York

STATE: New York

STATE: New York

STATE: New York

Sequence 678, Application US/09093972C
Patent No. 6825174
GENERAL INFORMATION:
APPLICANT: Nyce, Jonathan W.
TITLE OF INVENTION: COMPOSITION, FORMULATIONS & METHOD FOR PREVENTION
E TREATMENT OF DISEASES & CONDITIONS ASSOCIATED WITH
BRONCHOCONSTRICTION, ALLERGY (IES) & INFLAMMATION
                                                                                                                   ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ö
